Chalk is a porous sedimentary carbonate rock, soft and white. People often write on a chalkboard or blackboard. Chalk is widely used across the country in schools and colleges' classrooms for writing on chalkboards or blackboards; the popularity of chalk cannot be over-emphasized as demand has been on the increase over the years. Production of chalk is lucrative because return on investment is high so if you are looking for a business you can start with small capital chalk making is the perfect business. Thousands of pieces of chalk are used daily in Nigeria by schools, colleges and higher institutions; researches have shown that chalk production is of the most lucrative businesses with low start-up capital in Nigeria you can key into this business and be part of this goldmine. To start producing chalk, you only need a Chalk Moulding Machine, packaging materials like branded nylon and cartons, Plaster of Paris (POP), Calcium Carbonate and water.

Chalk Moulding Machine

A Chalk Moulding Machine is needed to produce chalk; it contains shaped cavities used to give a definite form to the liquid material when it hardens. Chalk production is a cold process heat is not needed, you just mix your POP and calcium carbonate in the right proportion with water and pure into the mould the mixture hardens after about fifteen minutes to form chalk, coloured chalk can be produced by adding pigments to the mixture. Rubber Chalk Moulding Machine from India is available in 240 cavities with clamps; it is portable, durable and affordable it's manually operated and doesn't need electricity to operate. The mould is supplied with a detailed manual with formulation on how to produce chalk. We deliver the mould to any location outside Lagos free; buyers in Lagos can visit our office and pick it up it is always in stock. The 240-cavity Rubber Chalk Moulding Machine with clamps goes for N35,000
